## Education

### Khalifa University

Aug 2026 – Present

*Master of Science in Computational Data Science*

- Relevant coursework: Advanced Statistical Inference, Machine Learning, Model Estimation, Data Science and Generative AI, and Seminar in Research Methods.

### New Uzbekistan University

Oct 2021 – May 2025

*Bachelor of Science in Software Engineering*

- Relevant coursework: Data Structures and Algorithms, Artificial Intelligence, Linear Algebra, Probability Models, Operations Research, and Theory of Computation.

### EPAM Systems: Java Web Development Training Program

Mar 2024 – Jun 2024

epam.com

- Completed structured training in Java fundamentals, SQL, HTML, CSS, Spring, and Spring Boot.
- Designed and implemented a functional web application as the program's capstone project.

## Experience

### New Uzbekistan University: Teaching Assistant

Jan 2026 – Aug 2026

- Taught Introduction to Programming and supported students during lectures and practical sessions.
- Assisted students with programming assignments, debugging, and fundamental problem-solving concepts.

### New Uzbekistan University: Research Assistant

Sep 2025 – Jan 2026

- Conducted reinforcement-learning-based optimization of train speed profiles to reduce energy consumption.
- Built simulation pipelines using real-world rail trajectory, gradient, and curvature data.
- Implemented and evaluated Q-learning variants and deep reinforcement learning models.

### Huawei Uzbekistan: Network Engineering Intern

Apr 2025 – Aug 2025

- Completed over 80 hours of training on 2G–5G technologies and mobile network architecture.
- Developed practical knowledge of DWDM, optical networking, and NetCareCloud for network diagnostics and RFC ticket management.
- Installed, configured, and commissioned 100G optical channels using Huawei OSN 9800 equipment in laboratory environments.

## Projects

### Energy-Saving Automation and AI-Based Scheduling for Urban Rail Transit Systems

- Conducted research on AI-based methods for energy-efficient train scheduling.
- Developed graph-based and scalable simulation models for railway systems.
- Validated energy-saving strategies in collaboration with Uzbekistan Railway authorities.

### Plant Disease Detection using Deep Learning

- Processed a dataset containing thousands of leaf images, applying image augmentation techniques to enhance generalization.
- Implemented multi-output learning to simultaneously predict disease type (4 categories) and severity level (5 levels).
- Utilized transfer learning with architectures such as VGG16, ResNet50, and EfficientNetB0 for feature extraction.

## Publications

### Advanced Applications of Machine Learning Techniques in FOITS

- D. Davronbekov, N. Juraeva and A. Boboev, "Advanced Applications of Machine Learning Techniques in FOITS," 2024 4th International Conference on Technological Advancements in Computational Sciences (ICTACS), Tashkent, Uzbekistan, 2024, pp. 773-778, doi: 10.1109/ICTACS62700.2024.10840715.

## Courses & Certificates

### Introduction to Software Engineering - IBM Coursera

- Explored software engineering principles, software lifecycle, and modern practices in application development.
- **Certificate:** Software Engineering

### Git and GitHub - IBM Coursera

- Comprehensive training on Git version control system and GitHub for collaborative software development.
- **Certificate:** Git and GitHub

Activities

- Core team, Google Developer Students Club at New Uzbekistan University

Aug 2024 – Present

- Hosted tech events and workshops, 300+ students engaged; facilitated student networking with techprofessionals; demonstrated public speaking and organizational skills.
- Co-Founder, Table Tennis Club at New Uzbekistan University

Oct 2023 – Present

- Managed university and international tournaments with 150+ participants, showcasing leadership, organizational, and multitasking abilities.
  - Represented New Uzbekistan University in 5+ tournaments within and between universities, demonstrating teamwork, responsibility, and athletic skills.
- Member, Uzbekistan IT Community

Sep 2024 – Present

- Participated in 10+ community discussions and events focused on advancing IT knowledge and collaboration.
  - Contributed to 5+ workshops and seminars aimed at fostering innovation and skill development in the tech industry.
  - Networked with 20+ industry professionals to share insights and explore emerging technologies.

Summer School & Hackathon

- DGIST Summer School on Deep Learning and Computer Vision

Jul 2025

Daegu Gyeongbuk Institute of Science and Technology (DGIST)

[github.com/AsilbekGit/Hangul-Recognition-Model](https://github.com/AsilbekGit/Hangul-Recognition-Model)

- Developed a Hangul character recognition model using deep learning and computer vision techniques.
- Google Solution Challenge 2024: Innovative AI-powered tourism app

Feb 2024

- Built a tourism app showcasing Uzbekistan’s landmarks with an AI personal assistant.

Volunteering

- 4th World Conference on Creative Economy.

Oct 2024
- International Summer School in Economics.

Jul 2024
- International Conference on Information, System and Convergence Applications.

July 2023
- Group Mentor for Freshmen at New Uzbekistan University.

Sep 2023
- Google I/O Extended.

May 2023
- Google Developer Group, Dev Fest.

Dec 2022
- Google Developer Group, Dev Fest.

Nov 2021
- World Friends ICT SKKU Volunteers.

Jul 2019
